VA-101P12

5−Output 12V DC Power Supply

The VA−101P12 is a 5−output power supply that powers 12V DC powered devices. The VA−101P12 can supply a maximum of 1A of current to each of five devices for a total of 5A. The power supply is especially useful in high−population installations for saving space and eliminating a large number of 12V DC power adapters.

FEATURES
