

6602 4x1:2 Serial Digital Audio Switcher

The **6602** is a high-performance switcher for digital audio signals. It takes any one input, provides reclocking and equalization and distributes the signal simultaneously to two identical outputs.

6602

FEATURES

- **Multi-Standard** - AES/EBU, IEC 958, S/PDIF, & EIAJCP340/12101.
- **Reclocking & Equalization.**
- **Compact Kramer DigiTOOLS®** - 3 units can be rack mounted side-by-side in a 1U rack space with the optional RK-3T rack adapter.

TECHNICAL SPECIFICATIONS

INPUT: 4 equalized digital audio, 110Ω on detachable terminal blocks, transformer coupled.

OUTPUTS: 2 reclocked digital audio, 110Ω on detachable terminal blocks, transformer coupled.

SAMPLING: 32, 44.1, 48, 96kHz sampling frequencies.

STANDARDS: AES/EBU, IEC 958, S/PDIF and EIAJ CP340/1201.

EQUALIZATION: Automatic up to 200mV eye pattern.

CONTROLS: 4 front panel switches.

DISPLAY: Power ON LED.

POWER SOURCE: 12V DC, 250mA.

DIMENSIONS: 12cm x 7.5cm x 2.5cm (4.7" x 2.95" x 0.98") W, D, H.

WEIGHT: 0.3kg (0.67lbs) approx.

OPTIONS: RK-3T 19" rack adapter.
